

## Introducing RJ45 Cat6A plug

TE Connectivity's latest Industrial IP20 RJ45 Cat. 6<sub>A</sub> plug is based upon "common core" technology, a platform technology used in the entire industrial RJ45 product family. This RJ45 Cat. 6<sub>A</sub> plug is extending the family of Field Installable Cat5<sub>e</sub> common core designs with a connector that can be terminated tool-less with Cat6<sub>A</sub> cables in the field.

This solution includes an automatic wire cutoff function, which provides an error-free installation and optimal performance in the field. Upon closing the core housing, the excess wire is cut off at the same time the wires are connected to the plug contacts. This TE solution is capable of terminating the most commonly used wire variant Cat6<sub>A</sub> and can handle 10 Gbps bit rates, supporting bandwidths of up to 500 MHz.

### Key Features

- Single Piece Common Core Cat. 6<sub>A</sub> plug with tool-less installation
- Automatic Wire cut-off function provides error-free installation and optimal performance

### Applications

- Control cabinets
- Motor/Motor Controls
- Machinery
- Robotics
- and Industrial Cable Installations in many other applications

### Benefits

- Rugged design and special features (e.g. metal latch) makes the plug extremely suited demanding Industrial applications
- Broad range of wires (AWG 26 to AWG 22, solid and stranded) can be terminated without the use of tools
- An error-free assembly and optimal performance will be obtained with integrated automatic wire cut off function

### Mechanical

- Enable use of solid and stranded wires and support for AWG 26 to AWG 22 wire diameters
- Achieve large span of wire insulation diameters with a supported span of: 0.88 – 1.5 mm
- Wide range of cable diameters supported (5.8 - 8.2 mm)
- Operating Temperature: -40 to +85 °C
- By using a sealed housing upgrade to IP65/67 is possible
- Supports 750 mating cycles minimum
- Plug can be reapplied to the same size cable up to 3 times

### Electrical

- RJ45 Cat6<sub>A</sub> (10 Gbps, 500 MHz)

### Materials

- Common Core: Thermoplastic (UL94 V0)/Copper Alloy
- Housing: Thermoplastic (UL94 V0)
- Housing latch: Stainless Steel

### Product Dimensions

W x H x L = 13.9 mm x 17.8 mm x 56.5 mm

### Standards and Specifications

Compliant to IEC 60603-7-51

### Product Offering

| Part Number | Description  |
|-------------|--|
| 2120892-1   | Industrial IP20 RJ45 Cat. 6 <sub>A</sub> Plug, IP 20                 |
| 1-2120864-1 | Variant 14; Metal Plug, RJ45, Cat. 6 <sub>A</sub> , 8 position, IP67 |

Authorized Distributor of TE Connectivity

## Cat6A common core ... How to get connected

### Step 1

Remove the cable jacket and insert wires into the cable managers.

### Step 2

Close covers by pressing with a common tool or by thumb until it is locked together and wires are automatically cut off.

### Step 3

Remove the separated wires... READY!
